

**Our mission is to provide students with opportunities
and experiences like nowhere else.**

We believe that learning happens everywhere- both inside and outside of the classroom. To ensure that our students are introduced to as many experiences as possible during their time at our school, we have created the Dyad Program.

Within this program, students will be exposed to a wealth of opportunities such as travelling to another country, learning graphic design or virtual reality, participating in sports and performing arts, and learning about health and fitness. **Students will be assigned a set of requirements that must be completed within a 2 year period.** These requirements can be met during and after school, as well as through participating in local community programs and events. These requirements will be tracked by the school, and students will be given plenty of opportunities to meet these requirements.

For more information, reach out to the Dyad Coordinator at your school
